Amrock - Software Developer

Who We Are
Amrock is one of the largest providers of title insurance, property valuations and settlement services in the nation. The company is an authorized agent of the highest-rated title insurers in the industry, and its solutions power many of the nation's largest residential lending institutions. Amrock is a preferred provider to five of the top 20 Fortune 100 companies and many of the largest residential mortgage lenders. The company is based in Detroit and retains regional operating centers in Ohio, California, Pennsylvania and Texas.

What You'll Do/Need
Unlike most technology teams, we focus on the business of our company. If you want to be on the leading edge of leveraging technology to solve business problems, we want to talk to you.

Responsibilities
- Design, develop or modify software by using various programming languages depending on the product(s)
- Modify existing software to fix errors, improve the overall quality and functionality, or update integrations with other software
- Analyze user needs to determine how software should be built or if existing software should be modified
- Develop and/or perform software automated testing procedures, solutions and frameworks to ensure software functions as needed
- Participate in design and code reviews

Requirements
- Experience with .Net, C#, Angular, or other programming languages
- Understanding of relational databases and database management
- Experience working with APIs or web services
- Knowledge of the Agile Methodology and familiarity with the SDLC
- Experience with git/github
- Exceptional oral and written communication skills regardless of audience
- Team-oriented experience highly desired

Nice to Haves
- Experience with software testing and design
- Technical knowledge Azure or AWS
