United Wholesale Mortgage (UWM) - Dev-I or Dev-X

Who We Are:
United Wholesale Mortgage (UWM) is looking for ambitious junior developers interested in growing their career in a fast paced fun environment. We are launching 2 software development training programs known as Dev-X and Dev-I that will teach you how to hone the skills you learned in bootcamp and make you into a capable Developer at UWM. You will have the opportunity to be taught by some of the best developers in the area from the largest wholesale mortgage lender in the country. We will teach you how to code the UWM way, while getting hands on development experience working on projects that make an impact on the future of the company. This program will prepare you to be placed on an application development team at UWM.
where results are everything.

What You Will Be Doing:
- Train in a classroom environment on the basics of application development at United Shore
- Learn industry standard application development processes
- Work in a team environment on a project to improve the company
- Present your completed project to United Shore Leadership

What We Need From You:
- Basic Knowledge of Object-Oriented Programming
- Experience with web-based technologies (ASP.NET, JavaScript, CSS)
- Basic understanding of relational databases and ability to query and modify data with SQL
- Familiarity of Agile Software delivery methodologies such as SCRUM
- Good communication skills

Preferred:
- Experience with MVC
- Experience with modern JavaScript libraries & frameworks
- Experience with Test Driven Development
- Experience with Unit Testing
